Stop Sell

The ability to suspend the sales of a ground product item has been introduced into the Chameleon Travel System.

How does it work?

A new data field has been introduced into the Ground Products record labelled 'Suspend', which if set to 'Y' (it defaults to 'N'), will suppress this item from being included in the Reservations Window and from context sensitive (??) searches.

```

AnzioWin Version 12.6zf CAPS NUM
```

Access Rights have been implemented via the 'dummy program'! STOPS which will deny access to set this field to 'Y' for anybody who does not have the requisite permissions level

Product Addition

This new field has been added into the latest version of Ground Products Series Add which features an enhanced entry facility which spans two screens, and gives you the ability to enter up to 15 seasons for your product in the place of the earlier 6 season model.

The contents of the screen are essentially the same as before, although these have been re-formatted to take advantage of the additional space

```

The sequencing of the fields is exactly the same – don't be confused by the subtle change of description on a couple of the fields, which hopefully will make their function clearer to you!

On Vtx	➔	Available B2C
Dir Y/N	➔	Report to Hotel
Foreign	➔	Online B2B Ref

The two most recent fields introduced into this form are Validity and the Stop Sale indicators.

Validity

This flag is used as an additional filter parameter in pricing. The valid settings are :

N	-	None (this is the default)
S	-	Fare MUST be valid on the Start Date
E	-	Fare MUST be valid on the End Date

Stop Sell

This flag is a Y/N field. When set to 'Y' this fare will not be offered in the Reservations window, nor will it 'count' as a valid fare by the system when it is looking for fares to validate entries appearing in context sensitive (??) searches

OK to Continue to Next Screen

AnzioWin Version 12.6zf CAPS NUM

On completion of the first screen, you will receive the prompt:

"OK to Continue to Next Screen?"

You may either <F2> or <Up Arrow> back up the screen to make any changes or enter OK to proceed onto the seasons entry screen

Seasons Entry Screen

The number of available seasons for entry in one pass has been increased from 6 to 15

Note that the product details of the series add fields remain visible at the top of the screen, and in addition it is possible to alter the Journey Code (J), the Valid Days of Service (Svc Dys), the party filters (Adt / Chd / Inf), and the Combine flag (C), against each individual season entry – these entries are defaulted to those entered on Page 1 if not overridden.

Clear Both Screens Y/B/1/2 {N} :

AnzioWin Version 12.6zf CAPS NUM

On completion of the entries and 'OK to Process', you will then receive the prompt

Clear Both Screens Y/B/1/2 (N)?

If you enter "N" then the contents of BOTH screens will be preserved, and control will be passed back to screen 1 for amendment / re-submission to create NEW fares.

Y or B	-	Clears down the fields in both screens
1	-	Clears down Page 1 fields leaving Page 2 in tact
2	-	Clears down Season table leaving Page 1 in tact
N	-	Leaves both screens in tact

N.b. Product details displayed at the top of Page 2 are in fact Page 1 entries.

Series Amendment

The suspend field is also available in the product amendment table.
